CONCEPT DONOR PROGRAM

This document outlines the costs involved in meeting the legal, clinical and Concept requirements that must be undertaken before a recipient is able to utilise a donation of either gametes (sperm / eggs) or embryos for their fertility treatment. It does NOT include the cost of any treatment for the recipient nor any import or export costs that may be involved.

For a full overview of all the fees involved in undergoing treatment with the use of your donor once all mandatory requirements have been met, it is essential that this document is read in conjunction with the current full Schedule of Fees.
